PROJECTS

SCHED GURU　　　　　　　　　　　　　　　　**Project Link**

A task scheduling web app built using React and Vite, enabling efficient management of routines through a fast, modular frontend with real-time updates.

ENERGY PREDICTION　　　　　　　　　　　　**Project Link**

A Python-based machine learning project that forecasts energy consumption using time-series data, anomaly detection, and clustering, with visualizations and model evaluation metrics.

ENERGY CONSUMPTION　　　　　　　　　　　**Project Link**

An Android app that helps users monitor and optimize their energy consumption in real time by analyzing usage patterns, estimating costs, and promoting energy-efficient practices through actionable insights.

HEART DISEASE PREDICTION　　　　　　　　**Project Link**

This project predicts heart disease using supervised machine learning algorithms like Logistic Regression and Decision Trees, analyzes clinical data and evaluates model performance with accuracy and confusion matrix.
